	Examiner Tung Vo	Art Unit 2613	

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 06 September 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

The reply must be filed within one of the following time periods:

- a) ☒ The period for reply expires 03 months from the mailing date of the final rejection.
 b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

 (c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
 (d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 09/12/2005 have been fully considered but they are not persuasive.

The applicant argued that Hollenberg's camera is designed for digital copying documents and deciphering UPC barcodes on street signals, Hollenberg neither teaches nor suggests any "software agent" for "video surveillance" or "visual recognition" of mobile buyer by vendor processor, pages 8-9 or the remarks.

The examiner respectfully disagrees with that applicant. It is submitted that the Hollenberg suggests a digital camera has capabilities of taking digital photographs or video recordings of the scene would be quickly transmitted to those who evaluate (recognize) emergency-situation information (col. 7, lines 47-60, visual information, col. 8, lines 7-24) so this suggests the camera would have capabilities of capturing an image of a user to be transmitted to the emergency-response dispatch center or other locations for evaluation.

The applicant further argued that Hollenberg does not teach "software agent", page 9 of the remarks.

The applicant respectfully disagrees with that applicant. It is submitted that Hollenberg teaches "software agent" (fig. 13) and the software agent would obvious be implemented in a known-location information service provider that includes one or more radios, accessible network, computer equipment with memory, which term includes storage, drives, and RAM units, and computer programs to provide for efficient situation information exchange between

them (col. 5, lines 12-28), wherein the service provider has the software agent (i.e. GPS, electronic mail, entertainment, games, news, television, particularly digital TV, and access to other networks, including the Internet, col. 7, lines 40-45) communicates between the mobile user and other network provider or server (Traffic Control, Events). In view of the discussion above, the claimed features are unpatentable over Hollenberg.
